

Dear Parents,

The Special Education Department (also referred to as the Tutoring Department) provides student assessments as well as individualized, research-based intervention programs for eligible students in small-group settings.

Eligibility for special education services is determined, with parent consent, through an evaluation process. This evaluation will be carried out by the school's Individual Education Program (IEP) team and will follow the guidelines outlined by the Individuals with Disabilities Education Act (IDEA).

Students who enter kindergarten with a current IEP will continue to receive needed special education services. If your child has an IEP, please contact me as soon as possible to ensure continuing services.

Sincerely,

Sarah Houmand
Special Education Coordinator
